DETAILED ACTION

Upon initial review of the claims it appears that claims 1-20 differ in subject matter and therefore require a different search in subject matter. In accordance with this, a restriction is deemed proper.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-16, drawn to a graphics processor to produce data for multiple output buffers, classified in class 345, subclass 506.
 - II. Claims 17-20, drawn to a system for processing graphics data using deferred shading, classified in class 345, subclass 426.

The inventions are distinct, each from the other because of the following reasons:

2. Groups I and II are related as combination and subcombination. The combination as claimed does not require the particulars of the subcombination as claimed for patentability, and that the subcombination has utility by itself or in other combinations. In the instant case, the combination of a graphics processor of Group I as claimed does not require the particulars of the deferred shading subcombination of Group II as claimed because the subcombination is not essential to the combination. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2676

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
